Overview

333 Collins Street is a 29-storey building with an exfoliated cladding, and the world's largest 19th century copper-clad Gothic domed chambers. The building also includes a 415-space, 4 level basement carpark, a nineteenth century ground floor banking chamber, 180 seat theatrette, a mosaic floored entrance, and 4 metre high typical floors.

Our role

Full pre contract and post contract services were provided.
